

# Velika logična pošast

## Kompozicija relacije same s seboj

Rdeče poščice označujejo urejene pare  $(a,b)$ , za katere velja  $a R b$ .  
Trditev  $a R \circ R b$  velja natanko tedaj, kadar obstaja  $c$ , tako da velja  $a R c$  in  $c R b$ .  
 $R \circ R$  imenujemo kompozitum relacije  $R$  s same s seboj.  
Z modrimi puščicami označu pare, za katere velja  $a R \circ R b$ .
