

Velika logična pošast

Kompozicija relacije same s seboj

Rdeče puščice označujejo urejene pare (a,b) , za katere velja $a R b$.
Trditev $a R \circ R b$ velja natanko tedaj, kadar obstaja c , tako da velja $a R c$ in $c R b$.
 $R \circ R$ imenujemo kompozitum relacije R same s seboj.
Z modrimi puščicami označi pare, za katere velja $a R \circ R b$.
Zapiši še definicijsko področje, zalogo vrednosti in polje relacije R .
