

Velika logična pošast

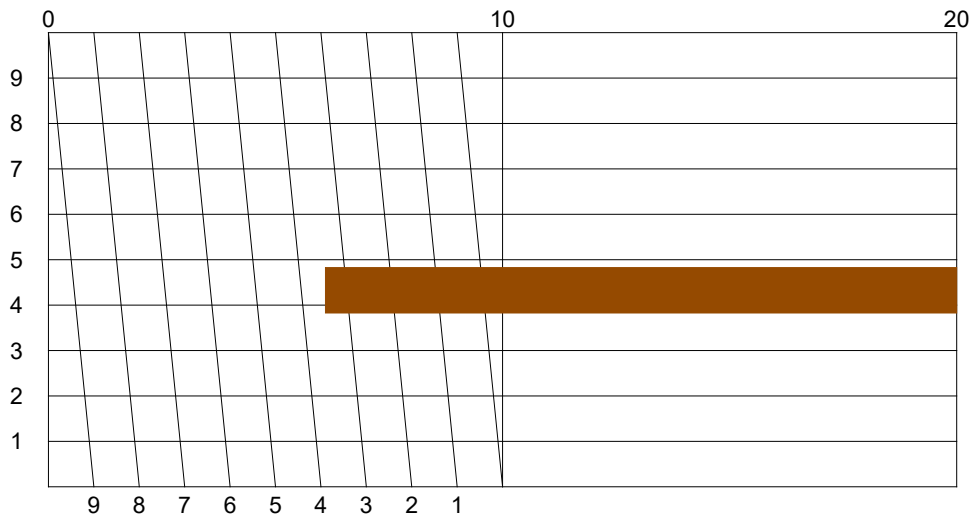

Meritev z diagonalnimi črtami

Imamo rjavo palico, ki je dolga nekaj več kot 10 enot.
Premaknemo jo na tisto vodoravno črto, ki se najbolje ujema z njeno dolžino.
Celo število enot nam povedo spodnje številke (+10),
prvo decimalalko pa preberemo na navpični številčnici.

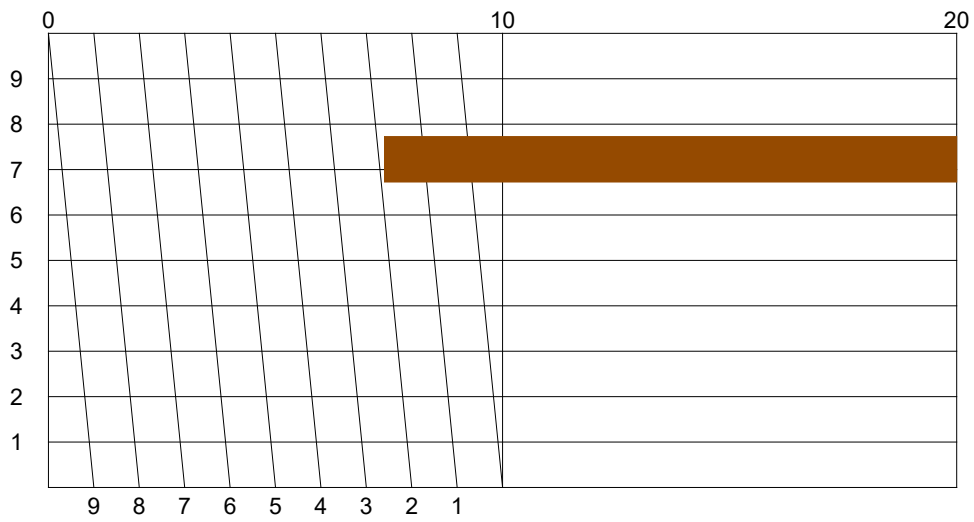

Dolžina palice je 14.2.
